

# Computers

I know a lot of you will be on technology, so my activities are going to be STEM/STEAM related. Use those problem-solving skills to have some fun and be creative. 😊 If you get a chance, email me a picture of your creation. [jblair@wlstigers.org](mailto:jblair@wlstigers.org) I would love to see what you have come up with!

🖥️ MRS. BLAIR 💾

**Blooming Flowers:** This is a fun activity where you cut out, color, and fold a flower. You place the paper flower in water and watch it bloom. It does say to print out a template, but I think you could make it just by looking at the picture.

**DIY Basketball Hoop:** Create your own basketball hoop and play. The link below has suggestions on materials to use but be creative if you don't have these materials at home. Have fun!

**DIY Launcher:** You can use this with your DIY Basketball hoop to see if you can make a basket.
